Jonathan Daniel Chang

jdc396@cornell.edu | +1-858-337-9189 | 409 College Ave. Apt. 407, Ithaca, NY, USA 14850

EDUCATION

Cornell University — New York, USA
Ph.D. Candidate in Computer Science — *August 2019 – Present*

- **Relevant Coursework**: Theoretical Foundations of Machine Learning, Foundations of Reinforcement Learning

Brown University — Rhode Island, USA
Master of Science in Computer Science — *August 2018 – May 2019*

- **Cumulative GPA**: 4.0 out of 4.0
- **Relevant Coursework**: Mathematical Statistics I, Computational Semantics, Advanced Probablistic Models in Computer Science

Brown University — Rhode Island, USA
Bachelor of Science in Applied Mathematics and Computer Science (Hons.) — *August 2014 – May 2018*

- **Cumulative GPA**: 3.9 out of 4.0
- **Honors Thesis - Exploring Machine Learning Methodologies to Determine Phenotypes of Pregnancy**: Researching applications of clustering algorithms such as K-means and Self-Organizing Maps to train a predictive model of pregnancy outcomes based on first trimester hospital diagnoses
- **Relevant Coursework**: Machine Learning, Statistical Inference, Topics in Collaborative Robotics, Introduction to Computational Linear Algebra, Inference in Genomics and Molecular Biology, Computational Molecular Biology

RESEARCH EXPERIENCE

Meta (FAIR) — New York, USA
Research Intern — *May 2022 – Present*

- Managed by Dr. Mikael Henaff, I investigated algorithms for Imitation Learning and Imitation Learning from Observations from image data for both continuous and discrete control
- Conducted extensive benchmarking for imitation learning algorithms from vision.

Cornell University, Ph.D. Research — New York, USA
Graduate Research Assistant — *August 2019 – Present*

- Advised by Prof. Wen Sun, my research explores designing efficient way of leveraging expert demonstrations for deep imitation learning algorithms for continuous control tasks.
- Developing algorithms for representation learning in reinforcement learning.
- Studying how to integrate offline data in designing scalable deep reinforcement learning algorithms.

Human To Robots Laboratory Rhode Island, USA
Graduate Research Assistant *December 2017 – September 2019*

- Developing an end-to-end deep imitation learning algorithm to learn goal-parameterized policies from demonstration on multiple robots such as Baxter, Kinova Movo, Kuka Iiwa, and proprietary Mitsubishi arms
- Constructing a virtual reality and mixed reality teleoperation system for different robots using Unity, the Hololens, and HTC Vive

Medley Genomics Rhode Island, USA
Research Software Engineer *May 2017 – May 2019*

- Researched a somatic phylogenetic reconstruction algorithm to address the full spectrum of complexities in cancer mutations
- Analyzed the accuracy of published algorithms determining the phylogenetic topologies of intratumor heterogeneity written in R, C++, and Python

Brown Center for Biomedical Informatics Rhode Island, USA
Research Assistant *August 2017 – August 2018*

- Created an unsupervised clustering algorithm to infer phenotypes of complex conditions such as diabetes and pregnancy
- Modified a Kohonen Neural Network to handle the categorical and sparse nature of hospital datasets

Raphael Lab, Brown University Rhode Island, USA
Research Software Engineer *May 2016 – May 2017*

- Researched the application of the G-Test on intertumor mutation datasets to test independence between discrete mutation counts and a continuous profile
- Engineered scripts in Python and C to test the biological veracity of the algorithm results

Teaching & Leadership Experience

Graduate Teaching Assistant, Cornell University New York, USA
Teaching Assistant for Cornell CIS Department *August 2019 – Present*

- Developing homework for graduate level course in the theory of reinforcement learning
- Implemented many state-of-the-art deep reinforcement learning algorithms for the undergraduate A.I. class

Graduate Teaching Assistant, Brown University Rhode Island, USA
Teaching Assistant for Computational Semantics *August 2018 – May 2019*

- Implemented many state-of-the-art and classic NLP algorithms such as Transformers, Word2Vec, ELMo, and a semantic parser to use as assignments

Fiction for Kids Rhode Island, USA
Regional Project Manager *May 2017 – May 2019*

- Introduced a new management system to optimize communication among 50 writers, editors, and illustrators across the United States, resulting in a four-fold increase in production
- Supervised the production process of 10 personalized picture books and oversaw the distribution of more than 100 pictures books to underprivileged or hospitalized children in the East and West Coasts

Brown University Pre-Medicine Mentorship Program Rhode Island, USA
Founder *Dec 2016 – May 2019*

- Drafted a proposal for an inter-institutional mentorship program and proposed it to multiple deans in the university and the medical school, ultimately receiving sponsorship from the Head Dean of Alpert Medical School
- Spearheaded the infrastructural design and organization of the yearlong mentorship program between Brown Alpert Medical students and Brown Pre-medicine undergraduates to provide first-hand guidance on the medical school application process
- Mobilized a team of 10 students to implement the program through marketing, recruitment, and web development efforts

Undergraduate Teaching Assistant, Brown University Rhode Island, USA
Teaching Assistant, Algorithmic Foundations of Computational Biology and Statistical Inference *Jan 2016 – Dec 2017*

- Constructed coursework, major projects, and examinations as well as their respective solutions with teams ranging from 3 to 10 students across 4 semesters under the supervision of professors
- Conducted weekly recitation sessions to supplement the course with additional instruction and resources
- Collaboratively graded the coursework for more than 300 students weekly

VOLUNTEER EXPERIENCE

Rhode Island Hospital Emergency Department Rhode Island, USA
Family Assistant Volunteer *Dec 2016 – May 2019*

- Served as a liaison between doctors and patients' families while providing emotional support to families for 4 to 8 hours weekly

Korean Adoptee Mentorship Program Rhode Island, USA
Volunteer Mentor *Dec 2015 – May 2019*

- Reconnected local Korean adoptees to their ethnic heritage through exposure to traditional cuisines, games, and language lessons

Brown Refugee Youth Tutoring and Enrichment Rhode Island, USA
Volunteer Tutor *Aug 2015 – Aug 2016*

- Provided relocated refugee children from the Middle East with English tutoring and with cultural context to ease assimilation into American society

AWARDS

Magna Cum Laude (2018): Awarded Magna Cum Laude for graduating in the top 20% of the graduating class at Brown University

Sigma Xi (2018): Nominated by professors in the Biomedical department and awarded membership to the Sigma Xi chapter (national honor society for scientific research) for excellence in student research during time at Brown

Outstanding Winner in the Brown Mathematical Contest for Modeling (2017): Won first place with a team at Brown for creating a dynamical systems war model for a hypothetical, multinational war simulation over the course of two days; will represent Brown in the international competition in February 2018

SKILLS & INTERESTS

Programming Languages: Python, Java, Julia, Matlab, C, MySQL, Javascript, C++, HTML/CSS, C, LaTeX

Frameworks/Libraries: Pytorch, ROS, Tensorflow, Scikit-Learn, Keras

Interests: Imitation Learning, Reinforcement Learning, Robotics, Origami, Competitive Weight-Lifting, High-Fashion, Snowboarding
